

## POWER PRO-ROOF

PRR10

### GENERAL INFORMATION

**POWER PRO-ROOF** is a sealant mass of unique chemical content. It is a combination of bitumens, butyl rubber and fibre glass. The product features high stretchability and elasticity. **POWER PRO-ROOF** may be applied on the majority of construction materials, including wet surfaces.

### TECHNICAL DATA

Chemical composition: modified composition of bitumens, fibre glass and butyl rubber  
 Stretchability: 170%  
 Thermal resistance: -45°C – +85°C  
 UV resistance: full (superb)  
 Aging signs: none  
 Water resistance: full  
 Carbohydrate resistance: none  
 Resistance to weather conditions: superb  
 Application temperature: -10°C – +50°C  
 Consumption: 750 g/m<sup>2</sup> on smooth surfaces, 1.9 kg/m<sup>2</sup> on porous surfaces  
**DO NOT APPLY ON SURFACES COVERED WITH SNOW OR ICE!**

### USAGE

Roofing work on flat and inclined roofs connected with the repair of all types of roofings, gutters, sheet metal, etc. For safeguarding foundations, concrete structures, underground steel structures, and terraces against leaking, etc. Protection against corrosion of pipelines and underground and ground structures. As an adhesive applied cold during roof repairs with bitumen materials. **POWER PRO-ROOF** may be applied on the majority of materials used in the construction industry, e.g.: brick, concrete, ceramic materials, wood, copper, lead, galvanized steel sheets, insulation materials, PVC, polyesters and all types of materials used for roofings.

### CLASSIFICATION

Article code	Name	Packaging	Type
PRR10	POWER PRO-ROOF	container 10 kg	surface protection adhesives, sealants

#### CAUTION
